

Lawrence Livermore National Laboratory

DOE NCSP Website FY2010 Summary Accomplishments

Chuck K. Lee

Presented at the Nuclear Criticality Safety Program Technical Conference
at Oak Ridge National Laboratory, March 1-2, 2011

Lawrence Livermore National Laboratory, P.O. Box 808, L-198, Livermore, CA 94551-0808

This work performed under the auspices of the U.S. Department of Energy by Lawrence Livermore National Laboratory under Contract DE-AC52-07NA27344

Topics of this briefing

- **NCSP website statistics**
- **FY2010 Accomplishments**
- **Future plans**
- **Q & A**

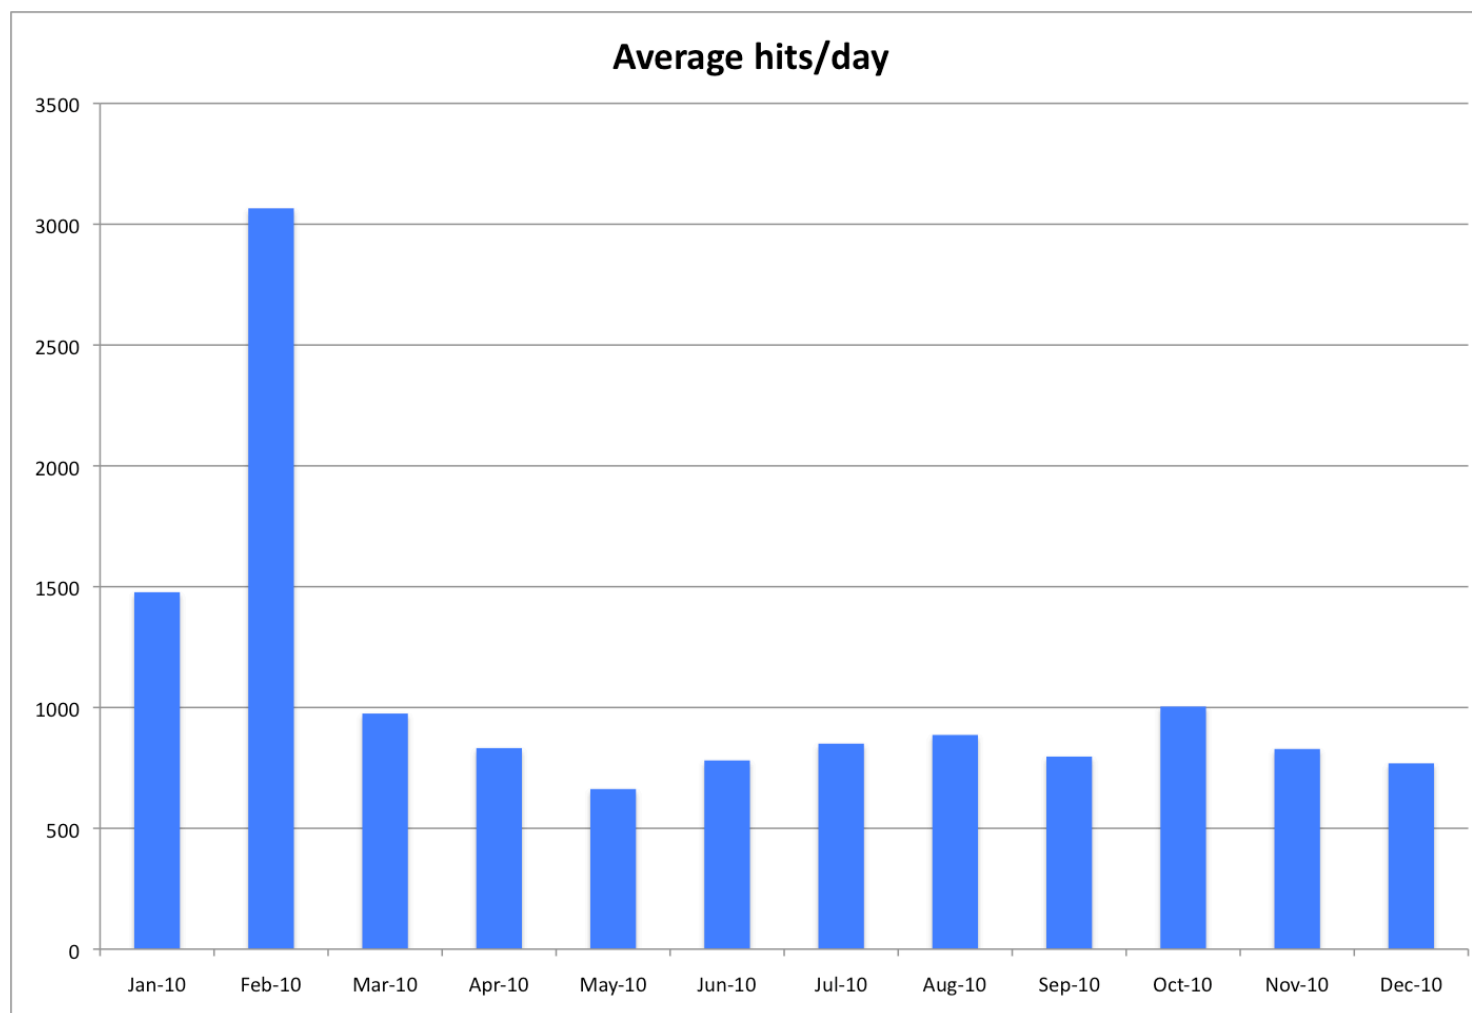

Website statistics

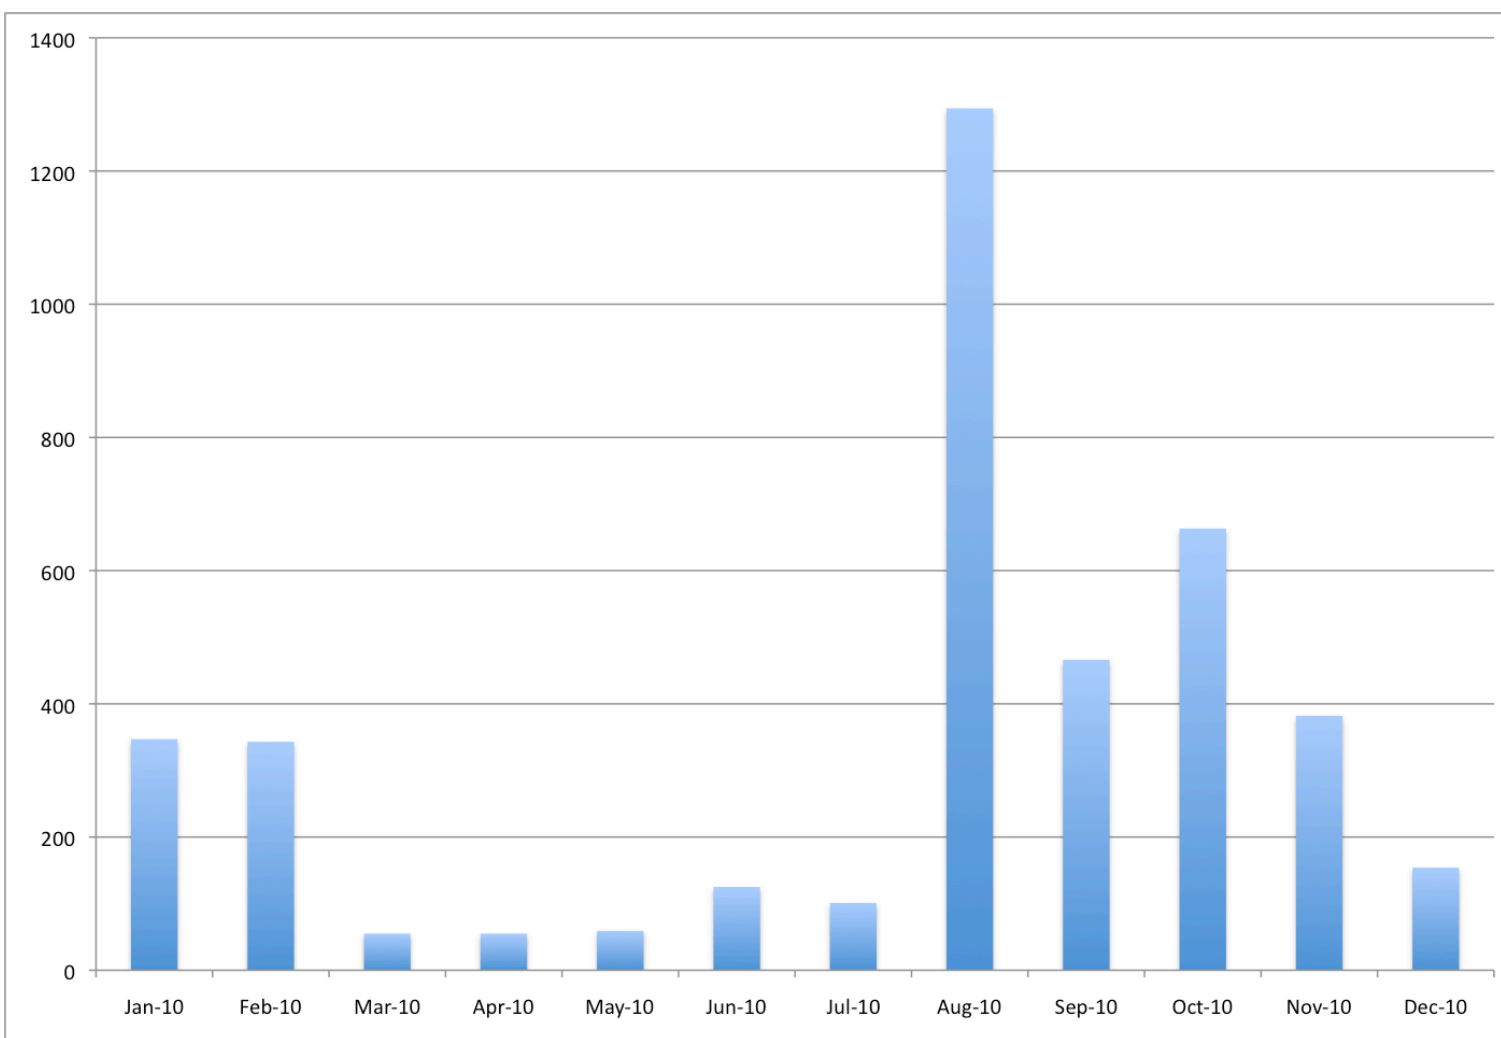

- **Visitor access counts**
 - Average access rate is 1,077 hits/day.
- **Integral Experiments Request Form usage**
 - 48 IER requests had been submitted.
 - Over 4,044 inquiries had been performed on IER database in calendar year 2010.
- **4-Day Criticality Safety Class**
 - Class students past and present had downloaded their class pictures over 35,970 times in calendar year 2010.
- **NCS Training modules downloads**
 - The fifteen training modules have been accessed over 7,007 times in calendar year 2010.
- **Hackers attempts**
 - Thwart over 84,483 hackers attempts in calendar year 2010.
- **Over 69,929 total visitors have accessed the NCSP web site since its inception in 1998.**

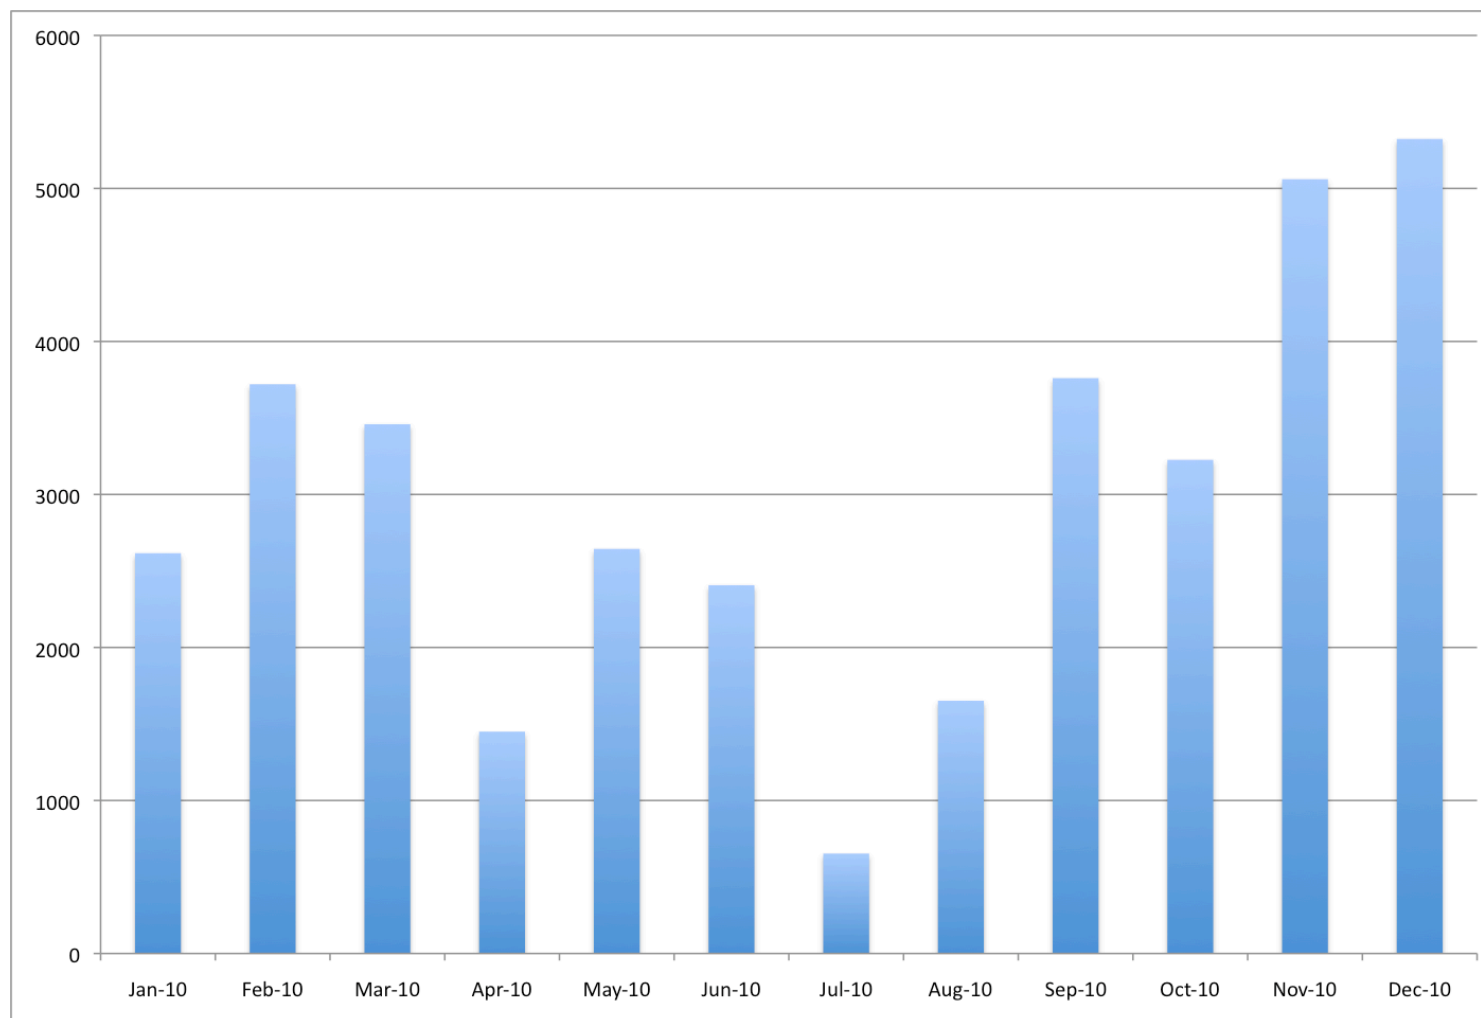

Website usage for CY2010

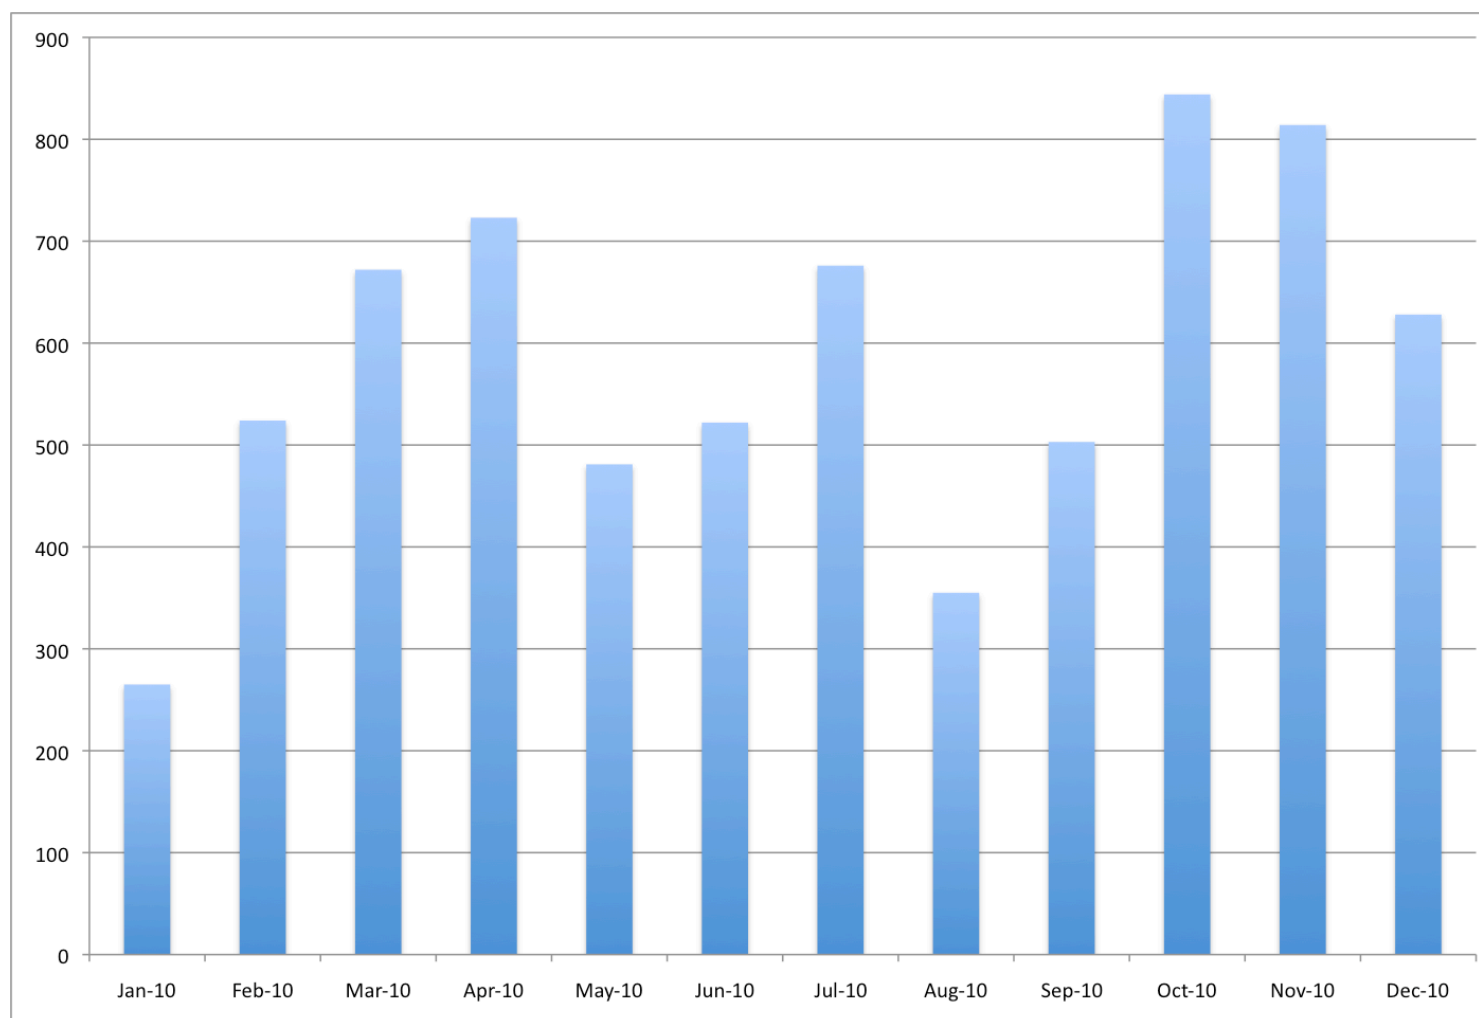

Integral Experiments Request Form accesses per month

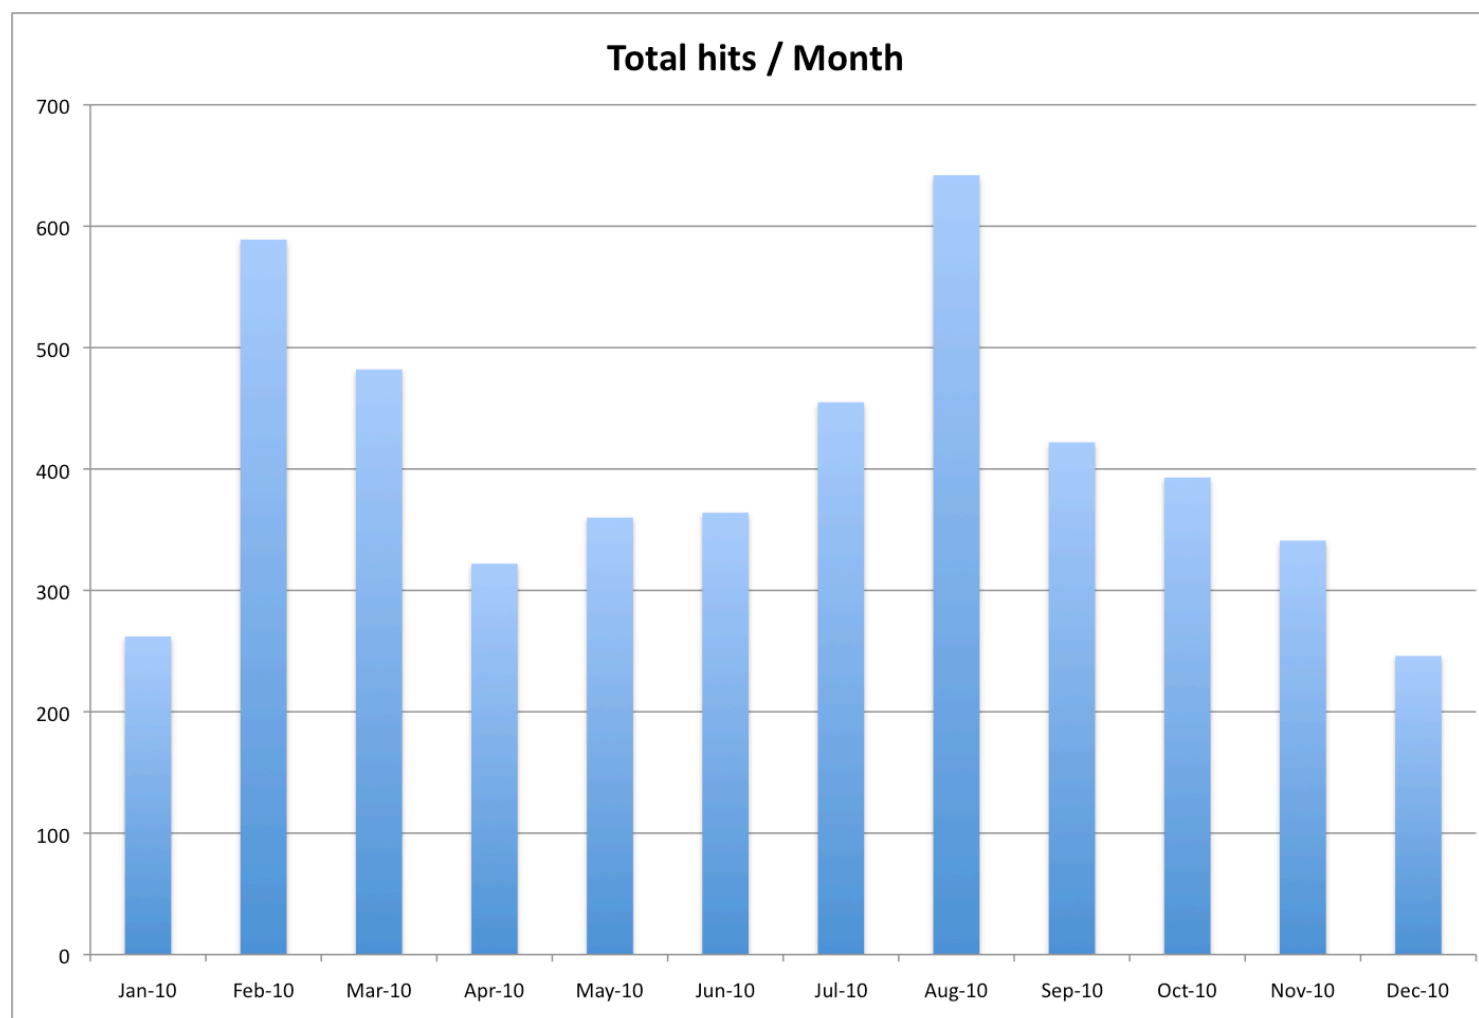

4-Day Criticality Safety Class pictures downloads per month

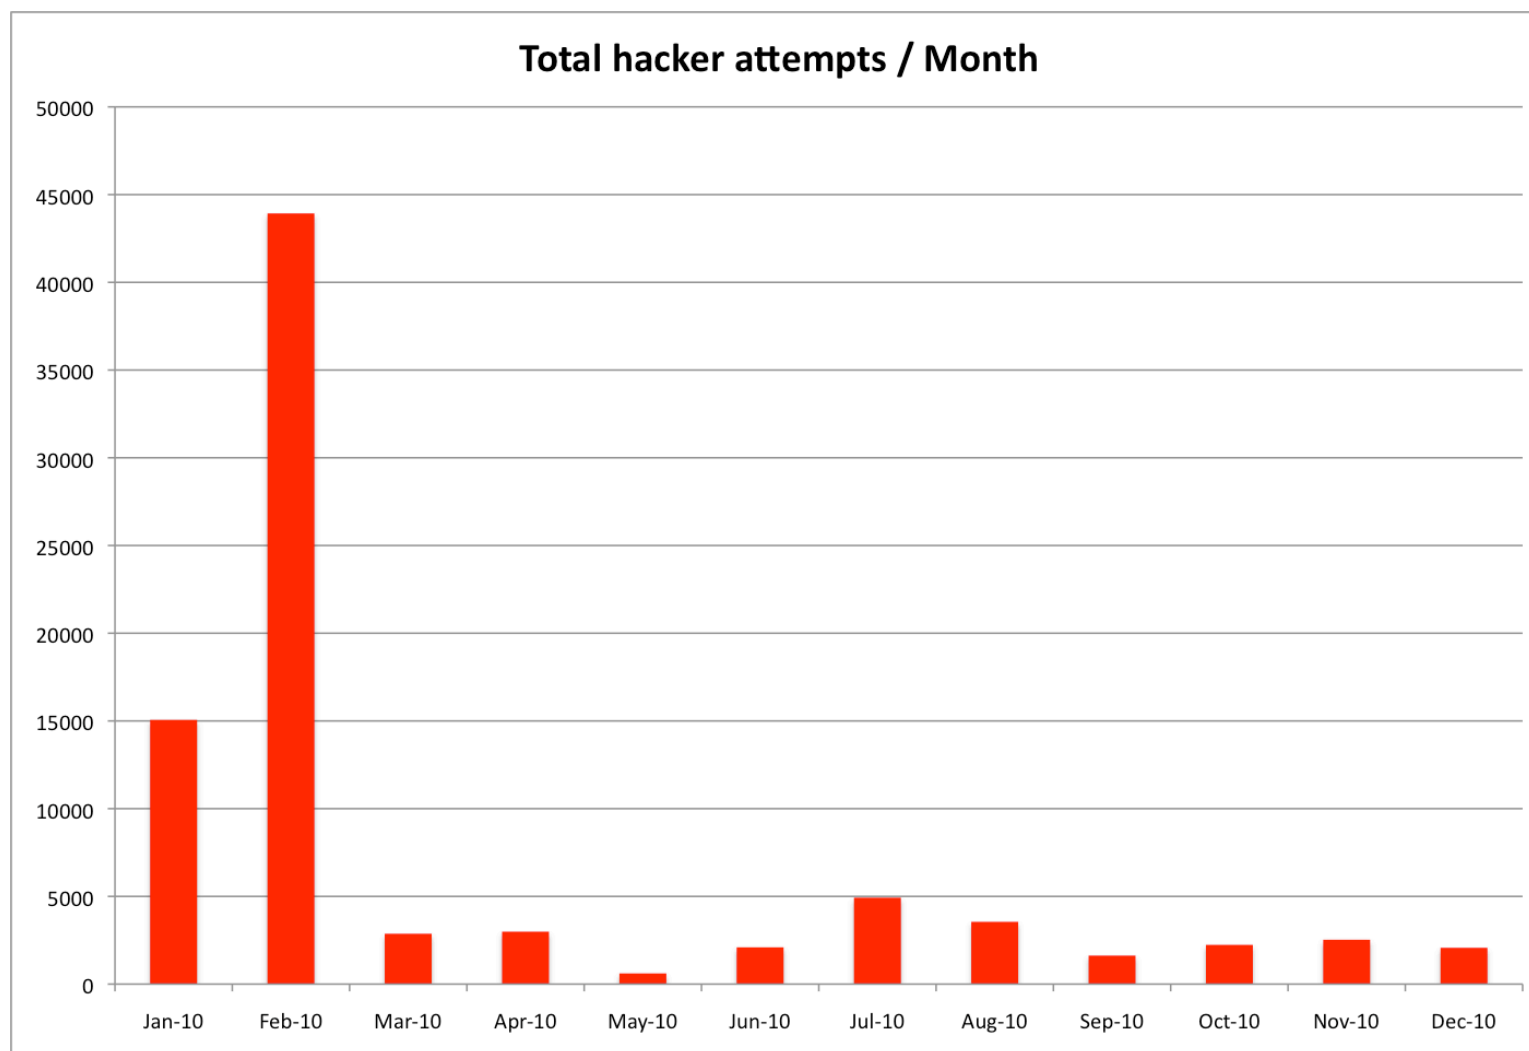

Training modules downloads per month

ARH-600 handbook usage

Hackers attempts on Website

Topics of this briefing

- NCSP website statistics
- **FY2010 Accomplishments**
- Future plans
- Q & A

LLNL IP&D FY2010 accomplishments

- Created and deployed IER form CED-1, CED-2, CED-3, and CED-4.
 - Created C_EdT Members Access web pages to provide a better communication and collaboration mechanism.
- Converted and deployed LACEF Heritage video series on NCSP Website.
- Deployed beta version of CSE searchable database on NCSP beta Website.
- Created and deployed a beta version of Nuclear Data Request Form on NCSP beta Website.
- Deployed and received Approval-To-Operate from the Los Alamos Site Office for the CEF Red Network (NTS-SLAN) at DAF.

Topics of this briefing

- **NCSP website statistics**
- **FY2010 Accomplishments**
- **Future plans**
- **Q & A**

Future plans for NCSP Website

- **Continue to enhance Integral Experiments form**
 - Provide on-demand pop-up text box
 - Provide various check boxes to filter IER forms into different piles (completed, archive, facilities, exported, etc)
 - Enhance Facility Members Access Only features to extend to other facilities – i.e. CEF, CEA-Valduc, Russia, AWE, etc.
- **Maintain records for all integrated experiments**
- **Create a new classified NCSP website to host future classified NCSP IER / benchmark data**

Topics of this briefing

- **NCSP website statistics**
- **FY2010 Accomplishments**
- **Future plans**
- **Q & A**
